Nurse Anesthesia Program

Established Excellence, Innovative Education

Established in 1942, the Nurse Anesthesia Program at Wake Forest School of Medicine has been providing quality education in nurse anesthesia for more than seven decades. Known for the outstanding quality of its graduates, the program follows the vision of Creating Excellence in Nurse Anesthesia by a commitment to the development of the total individual.

Tri-Development in Anesthesia
Explore For ICU Nurses

A three-fold developmental program to introduce ICU nurses to anesthesia nursing and develop valuable attributes among anesthesia program applicants.

Tri-Development Concept

This two day workshop will immerse you in a "Fast Forward" learning experience designed to provide you with valuable insight into the nurse anesthesia profession. It will also provide you with tools to help you gain admission to a program.

Created around the concept that a successful anesthesia applicant requires technical knowledge **(head)**, a self-awareness of their personality, strengths and weaknesses **(heart)**, and competence with manual skills **(hands)**, this program will expose you to unique and experiential learning opportunities that will lay a strong foundation for your future academic endeavors.

Designed for those with an interest in nurse anesthesia, including those applying to a program, the course presents academic concepts important to the advanced ICU nurse, while also weaving in a focus on personal development and hands-on clinical skills application.

Special activities include the Ultimate ICU Challenge, where participants team up to put their ICU skills to the test against a high-fidelity human patient simulator.

Curriculum

The seminar consists of classroom lectures, group discussions and hands-on laboratory learning. Content was derived from the input of ICU managers, directors of top nurse anesthesia programs and current nurse anesthesia students. Seminar faculty includes CRNA clinical instructors and anesthesia program administrators.

Developmental Realm: Head
► Shock: Differentiation of different types and treatment.
► Respiratory: Ventilator management and blood gas interpretation.
► Pharmacology: Pharmacologic principles, propofol and other hypnotic infusions.
► Monitoring: BIS, ICP, hemodynamic and nerve stimulator monitoring.

Developmental Realm: Heart
Is anesthesia for me? What do the top 20 programs consider a "Golden Applicant"? Discover your learning style and compare program formats, program selection factors and what makes a candidate strong. Learn about application secrets, application writing and personal statements and review examples. Get valuable insight on balancing family needs and finances.

Developmental Realm: Hands
Mask ventilation, interpretation of heart and lung sounds, 12-lead ECG, IV insertion skills. Test your skills in our high-fidelity human patient simulation lab—putting it all together in the Ultimate ICU Challenge.
