Credentialing Checklist for Visiting Students

1. **Proof of Covid Vaccine** (as of 8/1/2021 Pfizer, Moderna, Johnson & Johnson)
2. **7 year criminal comprehensive Background** run within 30 days of start
3. **Immunizations** (*including proof of flu vaccine between Oct 1 – Mar 31)
4. **Drug screen—12 panel**
   (Amphetamines, Barbiturates, Cocaine, Marijuana, Methaqualone, Opiates, Phencyclidine, Benzodiazepines, Methadone, propoxyphene, Oxycodone, MDMA)
5. **Current TB** (one w/in last 14 mos; and one w/ in 60 days of start, or annually for a clinical program)
6. **Current American Heart Association CPR card** (Some areas ACLS; Some areas PALS)
7. **Have current, unencumbered license**
8. **OIG/ EPLS/ Sex Offender / National Health care registry clearance**
9. **Non EE Regulatory Onboarding Training**: Non-Employee Regulatory Orientation

**Required Immunizations/Vaccinations:**

**Measles, Mumps, Rubella (MMR):**
- **Acceptable Immune Status:**
  1. Date of Birth - Born before 1957 compliant with MMR requirement
  2. 2 doses of Measles (or MMR) vaccine with 1st dose given on or after first birthday or serologic immunity result
  3. 2 doses of Mumps (or MMR) vaccine with 1st dose given on or after first birthday or serologic immunity result
  4. 1 dose of Rubella (or MMR) vaccine with 1st dose given on or after first birthday or serologic immunity result

**Varicella (Chicken Pox):** (History of disease no longer acceptable)
- **Acceptable Immune Status:**
  1. 2 doses of Varicella vaccine or serologic immunity result
  
  **Note:** Medical Student Services/Programs (e.g. Medical, PA, Grad, SRNA) require documented serology. If serology result is negative, students must also provide documentation of 2 doses of Varicella vaccine.

**Tetanus (Required for all Animal Care Workers):**
- **Acceptable Immune Status:**
  1. Documented history of Tetanus, Td, or Tdap within previous 10 years

  **Note:** Tetanus, Td, or Tdap is highly recommended for all HCWs

**Influenza (Seasonal):**
  1. Generally noted as October 1 – March 31 or as determined by WFBMC Influenza Task Force

**Tuberculosis Screening:**
  - One of the following completed within the past 12 months is required:
    1. 2 step TB skin test (administered 1-3 weeks apart) One 60 days within start
    2. 2 consecutive annual tests administered 10-12 months apart, with the most recent administered within the past 12 months
    3. Quantiferon Gold blood test (lab report required)
    4. T-Spot blood test (lab report required)
    5. IGRA blood test (lab report required)
  - If positive results, submit:
    1. A clear chest x-ray (lab report required) AND proof of past positive testing
    2. A Symptom Free TB questionnaire from the last 12 months.

**Recommended Immunizations/Vaccinations for ‘At-Risk’ HCWs:**
Recommended for individuals whose job activities or work areas may place them at high risk for certain communicable diseases.
1. **Hepatitis B**: ‘At Risk’ individuals are those who may reasonably anticipate contact of the skin, eye or mucous membrane with human blood or body fluid

2. **Neisseria meningitidis**: ‘At Risk’ individuals are those who work with the Neisseria meningitidis organism in microbiology laboratory areas

**Rabies**: ‘At Risk’ individuals are those who work with dogs
