

November 2018

Welcome to our e-newsletter!

As 2018 comes to an end, we are delighted to share the latest research under way at our institute.

We are looking forward to the new year and the preparations for a new cycle of research endeavors, education programming, and bringing regenerative medicine technologies to patients. The institute will again host the [World Stem Cell Summit](#) to be held Jan. 22-25 in Miami so please stop by to see us if you are in attendance!

Best Regards,

Dr. Anthony Atala

About Wake Forest Institute for Regenerative Medicine: The Wake Forest Institute for Regenerative Medicine is recognized as an international leader in translating scientific discovery into clinical therapies, with many world firsts, including the development and implantation of the first engineered organ in a patient. More than 450 scientists collaborate on regenerative medicine research at the institute, the largest in the world, working on more than 40 different tissues and organs. The institute is part of Wake Forest University and is located in the Innovation Quarter in downtown Winston-Salem, NC. Through partnerships and collaborations with many regenerative medicine centers internationally, the institute, which is driven by the urgent needs of patients, is making a global difference in the world of regenerative medicine.
